

## **Mentoring cell Report (2019-2020)**

The Mentoring Cell has been functioning in ZGC as an all-round students-teachers interactive medium. This medium serves various purposes for students' progression in every aspect. These aspects can be Academic, Psychological, Emotional, life lessons etc.

It allows students to interact individually with teachers and even discuss issues faced by students on personal level which may be causing hindrances towards personal progress in fields mentioned above. In cases where no such cases arises, soft skill lessons are imparted by the teachers e.g. personality development lessons, table manners, appropriate way to dressing to college, communication skills etc.

Each student is attached to a mentor until the end of their academic journey in the institution. This cell depicts an institution's capacity to project and practice the saying that, 'Education is all-round development'.

During the academic year 2019 to 2020 the college had 389 students' and 34 teachers. Each teacher was assigned 11 to 12 students. Mentoring sessions were to be held two times a month. The liberty and flexibility for conducting mentoring sessions were made available to the respective teacher but two sessions per month was made compulsory.
